PETA'S BEAUTY WITHOUT BUNNIES PROGRAM

COMPANIES THAT DO TEST ON ANIMALS

Frequently Asked Questions

Why are these companies included on the "Do Test" list?

The following companies manufacture products that *are* tested on animals at some stage of development. Those marked with a ♦ are currently observing a moratorium on (i.e., current suspension of) animal testing. Please encourage them to announce a permanent ban. Listed in parentheses are examples of products manufactured by either the company listed or, if applicable, its parent company. For a complete listing of products manufactured by a company on this list, please visit the company's website or contact the company directly for more information. Companies on this list may manufacture individual lines of products that have not been tested on animals. They have not, however, eliminated tests on animals for their entire line of cosmetics and household products.

What if a company isn't on either of PETA's lists?

Some companies have refused to respond to specific questions about their testing practices. It appears likely that these companies do test on animals at some stage of product development, and their refusal to clarify their testing policies appears to be an attempt to mislead consumers.

Other companies may be new. If you find a company not included on our lists, please share the company's contact information with PETA so that we can contact the company directly.

Legend

♦ The company is currently observing a moratorium on animal testing.
